WHAT IS MATARIKI?

*Matariki is a star cluster that appears
in the early morning sky in New
Zealand during the mid-winter months.*

*The star cluster is well known
throughout the world and at different
times of the year can be seen around
the globe. It is one of the brightest
clusters in the sky, containing
hundreds of member stars.*

*Historically, the stars of Matariki were
also closely tied to planting,
harvesting and hunting. If the stars
appeared clear and bright, it signified
an abundant season ahead.*

*Traditionally, Matariki festivities
included lighting ritual fires, making
offerings and various celebrations to
farewell the dead, honour ancestors
and celebrate life.*

*Nowadays, people all across Aotearoa
come together to remember their
ancestors, share (kai) food, sing songs,
tell stories and play music*
